

[Education Background]

Zhejiang Gongshang University

09/2023-06/2027

- Bachelor of Economics in Economic Statistics

- GPA: 4.01/5.0 Weighted Average: 90.15/100

International Top Innovative Talents Training Program (China International Education Institute) 11/2024-02/2025

- Strategic Business Analytics: From Data Insights to AI-Driven Decisions (University of Southern California)

- Acquired advanced skills in statistical modeling and optimization (regression, linear/integer programming), applying Python and Excel for data analysis and business decision support
- Wrote a research report on shared mobility platform operations, utilizing LSTM models for demand-supply prediction and linear programming for vehicle dispatch optimization to enhance urban transportation efficiency

[Major Projects]

2026 Mathematical Contest In Modeling (MCM)

01/2026-02/2026

- The Mirrorball's Destiny: Fame or Merit? Modeller & Programmer

- Reconstructed the voting data for Dancing with the Stars using the PL-PECON model in Python, achieving 96.73% consistency with historical eliminations; simulated counterfactual competition trajectories via the PRIME-AMC model
- Applied DSRF-SHAP analysis to reveal judges vs. fans divergence, and proposed the SARF model with adaptive ranking, maintaining a 0.9-1.0 Spearman correlation in final rounds with results visualized in MATLAB

2025 "Academic Excellence Climbing Program" Practice Training Camp

11/2025

- Research on High-Like Factors in Hainan Travel Guides Team Leader

- Constructed a standardized research dataset by performing data cleaning and NLP processing (e.g., tokenization, NER) on travel guide data
- Analyzed key factors influencing "likes" using statistical and machine learning methods (e.g., regression analysis, decision trees, XGBoost), and identified core predictors such as photo quality, popular attractions, and travel group type
- Won the Second Prize in the 4th "Statistical Data Engineering Training Camp" Training Outcome Competition

2025 China Youth Science and Technology Innovation Annual Challenge

07/2025-08/2025

- Wind from Zhejiang: A Practical Study on Multi-Modal Typhoon Warning and Community Catastrophe Insurance for Collaborative Loss Reduction — Based on a Comparative Analysis of Three Community Types in Hangzhou Bay, Zhoushan, and Wenzhou Data Analyst

- Integrated survey, meteorological, and claims data from three typhoon-prone regions, and applied Python for data preprocessing and text mining to identify policy orientations in collaborative disaster governance
- Conducted empirical analysis using Structural Equation Modeling (SEM) and XGBoost in Python; quantified that collaborative mechanisms enhance disaster reduction efficiency by 40%-60%, and proposed differentiated regional optimization paths and a three-dimensional policy framework

ZJSU College Students Innovation and Entrepreneurship Training Program

04/2025-Present

2025 ZJSU "Hope Cup" Youth Innovation Program

03/2025-11/2025

- Zhejiang Merchant Spirit and Entrepreneurial Resilience: Theoretical Logic and Empirical Evidence — Based on a Sample Survey of 263 Entrepreneurial Firms in Zhejiang Core Member

- Collected data from 264 entrepreneurial firms in Zhejiang and conducted field visits to over 16 enterprises
- Constructed a theoretical framework and performed empirical analysis to examine the impact of Zhejiang merchant spirit on entrepreneurial resilience, enriching research on entrepreneurial determinants
- The project was completed and rated as Excellent at the university level, and recommended for provincial approval

2024 “Academic Excellence Climbing Program” Practice Training Camp **09/2024-11/2024**

- Franchise Landscape and Development Trends of China’s Milk Tea Industry **Core Member**

- Collected and processed data on franchise fees, store distributions, and brand metrics; utilized Python to create word clouds, bar charts, and national store distribution maps, visualizing brand diversity, investment patterns, and spatial clustering
- Co-authored a research report analyzing industry competition and development trends, offering strategic insights for franchisees and entrepreneurs
- Won the First Prize for “Excellent Outcome”

[Internships]

Digital Zhejiang Technology Operation Co., Ltd. **05/2026-Present**

- Product Management Intern

- Conducted field user interviews for B-end government products and identified 8 core pain points from user feedback, converting findings into product requirements
- Independently drafted and updated over 10 system operation manuals with unified functional terminology and defined role-based permissions, and published all documents on the system homepage
- Wrote Product Requirements Documents (PRDs) for data-entry workflows, redesigned the error-correction module including requirement decomposition, process mapping, and interaction design (using Figma), and followed up product development, acceptance and launch

Hangzhou Mach Loop Technology Co., Ltd. **07/2025-08/2025**

- Software R&D Intern

- Acquired knowledge in memory management and network data, and contributed to fixing vulnerabilities related to memory overflows and duplicate releases
- Assisted in identifying and analyzing network traffic attack incidents, providing valuable solutions for subsequent work

Xiangshan Development and Reform Bureau **07/2024-08/2024**

- Data Analysis Intern

- Carried out work on county-level economic monitoring, economic performance analysis, and early warning
- Assisted the staff with collection, organization, verification, and statistical analysis of relevant economic data

[Extracurricular Experience]

“Ji+” Media Center of School of Statistics and Data Science, ZJSU **04/2025-Present**

- Deputy Director of Video Department (05/2024-05/2025)

- Assigned photography tasks and provided technical guidance; undertook media publicity of various events, and was awarded the Top 10 Visual Journalist at the 13th Journalist’s Day

- Director (05/2025-Present)

- Coordinated cross-team projects such as the Chinese New Year film; assisted with data collection and analysis for annual reports, and was awarded the Top 10 Visual Journalist at the 14th Journalist’s Day

T&P Statistical Research Institute, ZJSU **09/2023-05/2024**

- Officer of External Liaison Department

- Assisted with material procurement and preparation for statistics-related academic events, ensuring smooth event execution

[Other Achievements]

- Individual Scholarship of 2025 05/2026
- Advanced Individual in 2025 ZJSU Summer Social Practice 12/2025
- Advanced Individual in 2024 ZJSU Summer Social Practice 05/2025
- Individual Scholarship of 2024 05/2025
- Second Prize in The 14th Statistics Knowledge Competition for Colleges and Universities in Hangzhou 11/2024
- Comprehensive Scholarship for Outstanding Student of 2023 05/2024
- Active Participant in Social Activities 05/2024
